

# **SAGE FINANCE PROTOCOL**

OVERVIEW AND WHITEPAPER

## WHY WOULD SOMEONE BUY SAFT?

Blockchain technologies and cryptocurrencies are disruptive and are growing at an exponential rate (<https://www.technologyreview.com/s/607947/the-cryptocurrency-market-isgrowing-exponentially/>).

We believe that Sage as a new, easy to access cryptocurrency, could appeal to regular people in larger numbers than we've seen with existing cryptocurrencies such as Bitcoin and Ethereum.

### **As such, we think that Sage will have great appeal for:**

- Long-term holders. Those who wish to buy and hold Sage for its future use cases.
- Digital coin enthusiasts. Those looking to acquire Sage coins and get involved in cutting edge technology before anyone else.

## **SAGE FINANCE PROTOCOL (SAFT)**

The main focus area We have focused our research and attention on with huge potential market for the use of Sage. The speed of our market penetration into it will depend largely on the sales made in the Sage token sale.

## **THE SAGE TOKEN PRESALE (FUNDRAISER)**

Early adopters can obtain some tokens via our Sage token sale. We are allowing users a chance to purchase Sage in advance of it being listed on the various exchanges.

What we can achieve will vary based on the number of tokens sold in our token sale.

Sage will be holding its token sale on **DXSALE** April 8th of April, 2021. The token sale will run until the initial coin block has been taken up (Hard Cap) or 11th of April, 2021.

There will be a total of 10,000,000 (10 million) Sage coins available for

Presale Price: 45000 SAFT for 1BNB

Listing Price: 36000 SAFT for 1 BNB

**Payment must be made in BNB.**

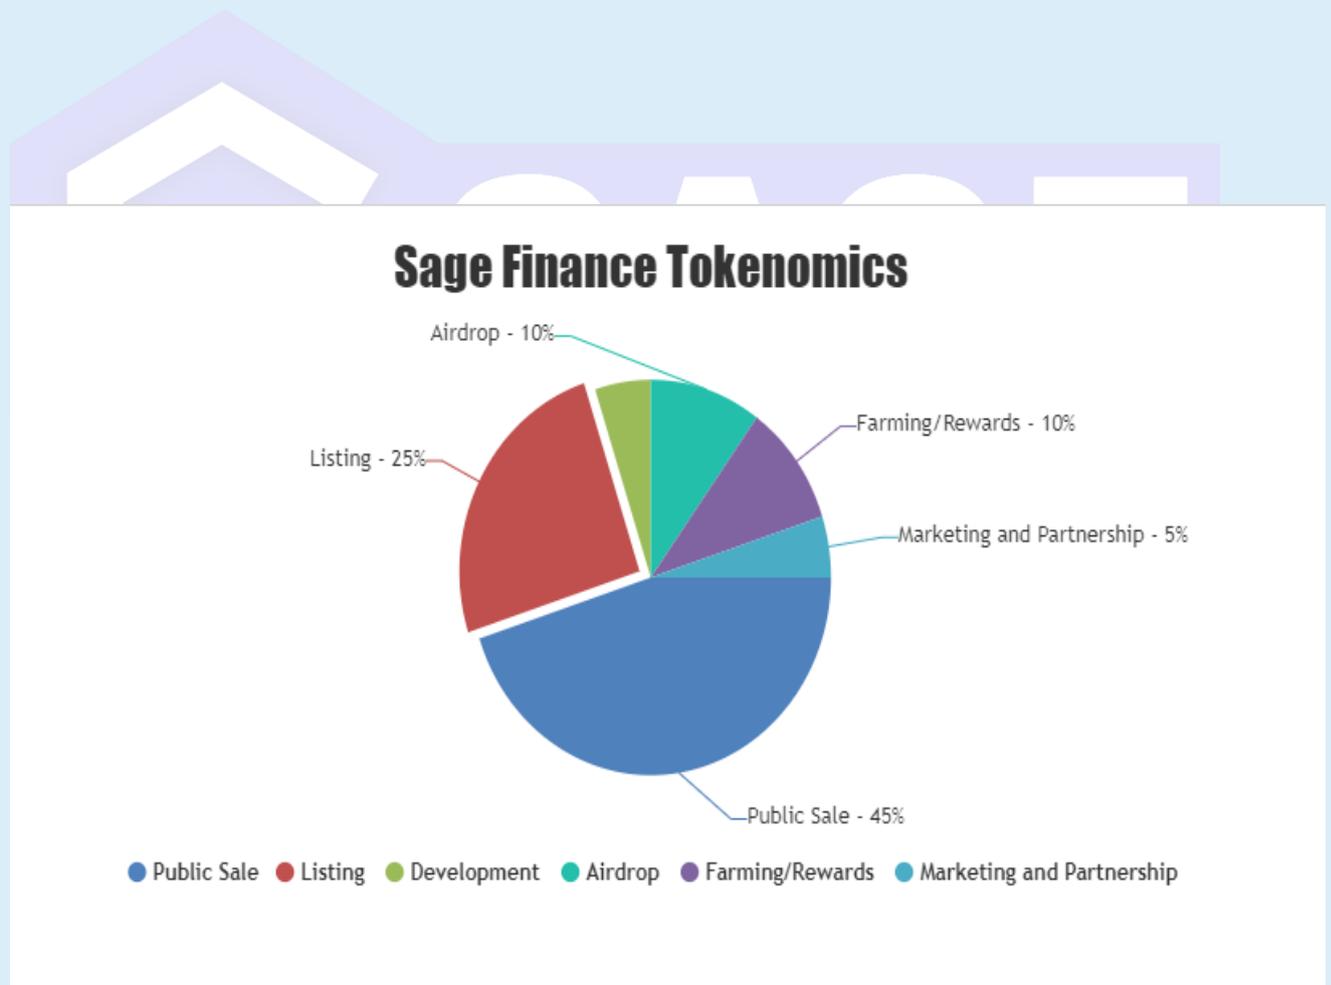

Participating in the Sage Token Sale Sage coins will be available in the token sale before they are accessible by the general public. Buyers will be able to purchase Sage coins With BNB. If you have other, alternate, cryptocurrencies that you would like to use to purchase Sage coins then please Convert to BNB before taking part in the Sage Token Sale

The Sage Token will take place on DXSALE and the link will be provided on our website. Simply create an Binance Smart chain account and follow the instructions to get involved with the token sale. You will be able to track your transactions and see (in real time) the exchange of BNB for Sage. At the end of the token sale you will claim your Token using the PRESALE LINK and your Sage balance will be moved into Binance Smart chain wallet address.

**NOTE: Liquidity is locked**

## TOKENOMICS

The integrity of the SAGE FINANCE PROTOCOL Community has been our priority when designing our tokenomics model. To align with this, we will permanently lock liquidity upon listing, and Distributed as listed in the chart below. The SAGE FINANCE PROTOCOL community retains the ability to decide when these marketing tokens become unlocked, and subsequently, how they are spent. Community-driven governance forms an essential part of our tokenomics model and will play a significant role in how the SAGE FINANCE PROTOCOL develops in the future.

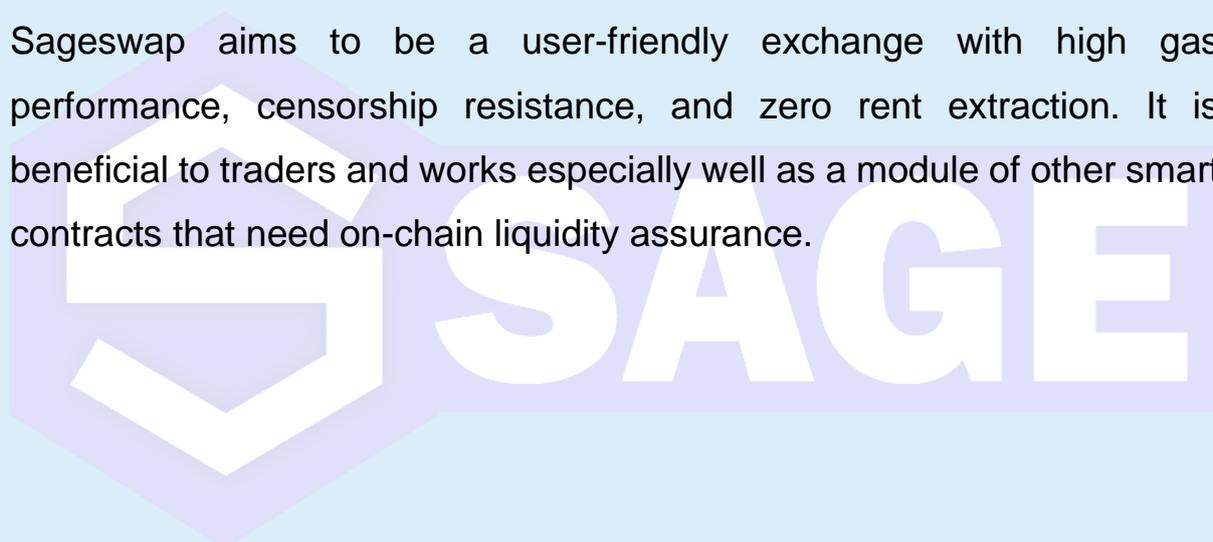

# ROADMAP

## Roadmap

## **SAGE SWAP**

SageSwap is a Binance-based decentralized exchange protocol. The Binance smartchain does not need any external dependencies to run. Anyone can use web3 to access Sageswap and incorporate Sageswap features into their apps. Sageswap is fully decentralized and user-friendly. It's a 100 percent on-chain market maker that allows users to exchange BEP20 tokens for BNB and vice versa. Each SageSwap pair holds two assets' pooled reserves and provides liquidity for them while maintaining the invariant that the product of the reserves cannot fall below zero. Sageswap aims to be a user-friendly exchange with high gas performance, censorship resistance, and zero rent extraction. It is beneficial to traders and works especially well as a module of other smart contracts that need on-chain liquidity assurance.

## DISCLAIMER

*SAGE FINANCE PROTOCOL makes no representations or warranties of any kind, whether express or implied by statute or otherwise, including, but not limited to: – any representations or warranties relating to merchantability, fitness for a particular purpose, description, suitability, or non-infringement; – that the contents of this document are accurate and error-free; This whitepaper does not constitute advice or a recommendation on the merits of participating in the SAGE token sale by SAGE, its officers, administrators, managers, staff, agents, advisors or consultants, or any other individual to any recipient of this document. Participating in the SAGE token sale entails a serious risk of losing any or a significant portion of the funds invested. Hackers or other malicious groups or organizations may attempt to interfere with our system/network in a variety of ways, including malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing, which may result in the loss of your cryptographic tokens, as well as the loss of your ability to access or participate in our system/network. There may be no recourse in such a case, and holders of cryptographic tokens are not given a redress, refund, or reimbursement.*
